

Overcoming barriers to PayPal adoption of OpenID

Ashish Jain
Product Manager, PayPal
OpenID Technology Summit, April 2010

- Developer API
- RP On boarding
- Security

- Is this a valid PayPal user?
- SSO + Attributes
- SSO + Richer Attribute set
- Data sharing (user not present)

- Common SDK / Library
- Common User Consent Flow
- Common Key Management requirements
- Common Partner on boarding process

- Open source libraries
- Interoperability issues
- Automated testing tools
- RP Certification (e.g. ICAM Profile compliance)

Security is both a feeling and a reality. – Bruce Schneier

Reality. Perception. Action.

- Session Swapping Issue
- Independent security evaluation.

SUMMARY

- **Developer API** – Multiple APIs, Multiple SDKs.
Learning curve.
- **RP On boarding** – Interoperability. Certification.
- **Security**
